

## BKB Building Solutions Fire Pump Enclosures

BKB Building Solutions' fire pump enclosures are engineered enclosures made from 2mm sheet metal and powder coated to ensure longevity in all weather conditions. Standard features of enclosures include:

- Whirly bird
- Ventilation louver with anti-vermin mesh
- External bell and strobe
- Internal lighting and strip heater
- Wired distribution board with external junction box if required
- Fully equipped and piped fire pump within enclosure
- Sealing of penetrations
- Signage and warning stickers
- 003 lockable swing doors
- Full AS2941-2013 compliance
- Painted base

### Optional features:

- Roller doors in lieu of swing doors
- Acoustic lining (85-91dBa @ 1 Meter)
- Galvanised base
